Juicer
400W QuickClean, 1.5 L, Drip stop

RI1832/30

Highlights

Drip stop spout

When activated, the drip stop will prevent the juicer from dripping. The drip stop spout is very easy to clean as it is detachable and it is made of dishwasher safe materials. With one simple move, you prevent the juice from dripping and keep your counter top clean.

See-through pulp container

Enjoy a true interactive juicing experience. The lid and the pulp container are transparent so you can see your fruits and vegetables being juiced. You also directly see when the container is full which means it is time to empty it.

All pulp in one place

All the pulp is collected in the only place where it should be : the pulp container. Due to its round design and smooth surfaces, it is easy to reach and remove. It also means there is no need anymore to remove pulp from other parts such as the lid.

Compact design

With only half the size*, this juicer takes limited space. You can leave it on your kitchen counter top or store it easily.

Direct serve

This juicer allows you to use your own glass (Max 12cm height). Place it directly under the integrated tap and you are ready to juice.

Dishwasher-safe

All removable parts can be cleaned in the dishwasher.

Easy assembly

The different parts of the juicer have been designed to allow an intuitive assembling and handling. This drastically facilitates the whole cleaning process.

Make up to 1.5L in one go

Thanks to the innovative QuickClean extraction system, you can make up to 1.5L of juice in one go without needing to empty the pulp container.
